Autonomous routes + teammate parking

Official FIRST BIOBUZZ CAD | Current robot routes | Coordinates match the Pedro visualizer

Positions are robot pose origins. Starts use an 18-inch footprint; paths show robot-center motion, including frame bypasses.

Field geometry: official FIRST BIOBUZZ STEP v26-27.2. Field design/CAD copyright FIRST and original designers. Route colors and labels are overlays.

COLOR KEY + STARTING POSITIONS

R1 Red Basket 1 Shoot 4 and Park

Start (56.577, 9.165) | 90 degrees

Shoot four at 1500 ticks/s, then park

R2 Red Park Only

Start (35.317, 9.165) | 90 degrees

Leave start and drive to park

B1 Blue Basket 1 Shoot 4 and Park

Start (84.923, 132.335) | 270 degrees

Shoot four at 1500 ticks/s, then park

B2 Blue Park Only

Start (106.183, 132.335) | 270 degrees

Leave start and drive to park

MARKERS

Circle = start | Star = shooting position

Square P = our robot; dashed box = teammate

Both autons per alliance use our near slot.
Teammate gets the farther slot.
3.65-inch gap assumes two 18-inch robots.
